

ABSTRACT

There is provided an imidazole derivative useful as a thrombosis treating agent, which is represented by the
 5 formula (I):

wherein R represents an optionally substituted cyclic hydrocarbon group or an optionally substituted heterocyclic group, W represents a bond or an optionally substituted divalent linear hydrocarbon group, X represents an optionally substituted divalent hydrocarbon group, Y represents -CO-, -S(O)-, -S(O)2- or a bond, ring A represents an optionally substituted pyrrolidine ring, an optionally substituted piperidine ring or an optionally substituted perhydroazepine ring, Z¹ and Z³ independently represent a bond or an optionally substituted divalent linear hydrocarbon group, Z² represents -N(R¹)-, -O-, -S(O)-, -S(O)2-, -CO-, -CH(R¹)- or a bond, ring B represents an optionally substituted imidazole ring, wherein a substituent which the optionally substituted imidazole ring represented by ring B may have may be taken together with R¹ to form an optionally substituted ring, and a represents 0, 1 or 2.
